Iron Bull DTB beast models are built to work. Every DTB sits atop of a dual layer of 6" I-beam weighing in at 12 pounds per foot main frame construction. That's 24 lbs/ft of pure steel putting maximum strength into the most critical part of your trailering system. These show-stopper trailers are built to haul. 14,000-21,000 lbs of GVWR and are equipped with enough lifting power to ensure you can always get your job done.

Each Iron Bull 83 wide dump comes equipped standard with an industry best 7 guage floor and 24" high 10 gauge sides with 7 machined breaks that will not bend, bow, or buckle even under the most demanding conditions. One of the most unique features on the Iron Bull DTB is the structure under the bed. Another instance of strength where it matters is our one of a kind ramp tracks. These full length bed runners ensure your floor is never warped across the crossmembers by any heavy tracked equipment you might haul. We have also equipped 10k jacks and a side step for easy bed access. A three way gate will ensure maximum flexibility for transport and dumping.

Top tier components come together with the most rugged construction on the market to deliver a dump trailer like no other. Dexter Nev-R-Adjust brake axles and radial tires provide a solid foundation for each Iron Bull dump trailer and ample grip for stopping power. Sherwin-Williams Powdurda Powder coat gives each trailer a rugged finish with a showroom shine. 516 hydraulic cylinders are nested into a scissor hoist and provide the muscle for each Iron Bull dump trailer with KTI remote operated hydraulic pumps feeding the beast. USA made, lifetime LEDs are provided by TecNiq lighting and all units are powered by an Interstate deep cycle battery.
